(54) Title: SYSTEM AND METHOD FOR PRESENTING AND DISTRIBUTING MEDICATION INFORMATION

(57) Abstract: The present invention relates generally to a system for presenting and distributing information related to the medication of a patient comprising a terminal device and a method of presenting and distributing information related to the medication of the patient in such a system. The system comprises a terminal device communicating with a wireless communication system, and a medicament device including medicament containing means arranged to hold a medicament; a dispensing mechanism arranged for dispensing medicament from the medicament containing means; means for obtaining information related to the medication of the patient; and a communication device for wireless communication to enable transfer of data related to the information from the medicament device to the terminal device comprising, inter alia, means for receiving the data from the communication device and being arranged to present information related to the medication of the patient to a user.
